

1589GFP

15.6-inch Sunlight Readable Touch Display

Xenarc Technologies Corp.

■ Connecting 1589GFP Display with Your Device

1. Remove the 12 screws (circled in red below image P1) and remove the input compartment cover to reveal the input compartment as show below in image P2.

P1. Remove 12 Screws holding the cover

P2. Input Compartment after cover removed

2. Each cable needs to be matched with correct size Waterproof Rubber Grommet. For example, the included HDMI cable is 6mm in diameter (below image P3), so take Size #6 Rubber Grommet (Size number is marked on the Rubber Grommet. Size #6 is already pre-installed on the monitor.) and install it onto the HDMI cable (below image P4). *** If you are not using the included cables, please measure the cable wire diameter to determine the correct size Rubber Grommet to use.**

P3. Diameter of HDMI cable: 6mm.

P4. Install Rubber Grommet onto HDMI cable.

3. Plug the HDMI cable into the monitor, push the Rubber Grommet down into the slot like the below image P5. Ensure that the Rubber Grommet is pushed to the very bottom in order to guarantee the best water protection. Connect the other side of the cable to your source device.

4. Repeat step 1 through 3 to connect the rest of the cables. (Included USB Cable is Size #4 and DC cable is Size #3 and the respective Rubber Grommets are already pre-installed in the monitor. Other sizes can be found in plastic bag that came with the monitor if you would like to use your own cabling)

P5. Cables together with Waterproof Rubber Cable Grommets installed into Input Compartment.

5. Reinstall the input compartment cover and tighten the 12 screws as image P6 shown below.

P6. Please ensure that the Rubber Grommets are pushed to the very bottom in order to guarantee the best water protection.

■ Turning On the Display

1. Connecting the DC power cable to DC input. Pick one of 3 pin terminal block or DC plug power input to connect your power source.

* Do not connect the positive and negative poles in reverse.

2. The display will be turned on automatically after power up.

Operation Instruction

OSD Buttons

1. Power LED Light
2. Auto/Exit
3. Menu/Enter
4. On/Off
5. Up
6. Down

OSD Menu

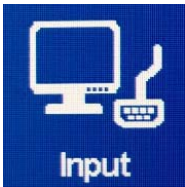

1. Press the **MENU-button** to activate the OSD window.
2. Press **Up** or **Down** to select the navigate through the functions. Once the desired function is highlighted , press the **Menu-button** to activate it. If there is a sub-menu, press **Up** or **Down** to navigate through the sub-menu functions.
3. After adjusting the value , press **Menu-button** to save the value.
4. Press **Menu-button** to select Exit. It will exit the OSD Window.

Main Menu	Sub-Menu	Description	Default
